Re: Fort Mojave Smoke Shop  
8501 South Highway 95  
Fort Mohave, Arizona, 86440

Dear Ms. Salire:

The Fort Mojave Indian Tribe (FMIT) is submitting this letter as requested in your e-mail dated April 14, 2015. Your e-mail requested the FMIT to provide a written response to items discussed in a teleconference on March 5, 2015 regarding the status of the leaking underground storage tank (LUST) incident at the above referenced location. As requested FMIT provides the following information.

- Environmental Technology, Inc. (EN TECH<sup>®</sup>) will begin quarterly groundwater depth to water/free product check field activities, in lieu of monthly monitoring activities, beginning in the Second Quarter of 2015 (April through June).
- EN TECH initiated the use of low-flow groundwater monitoring well purging/sampling methodology in March 2015. This method of purging/sampling will continue in subsequent groundwater sampling events.
- EN TECH has included in the First Quarter 2015 Groundwater Monitoring Report log-distance plots of the estimated lateral extent of the groundwater contaminant plume.
- EN TECH has included in the First Quarter 2015 Groundwater Monitoring Report information regarding potential down-gradient Public Water Supply (PWS) wells and private wells.
- EN TECH is currently evaluating various options for possible remedial actions based on

the findings of the low-flow groundwater sampling technique and analytical results which will be included in the Second Quarter 2015 Groundwater Monitoring Report.

Please see ENTECH's First Quarter 2015 Groundwater Monitoring Report for additional information.

Sincerely,

A handwritten signature in blue ink, appearing to read 'Timothy Williams', with a long horizontal flourish extending to the right.

Timothy Williams  
Chairman, Fort Mojave Indian Tribe
